WINNING PRIZE FOR CHOCOLATE LAYER CAKE
Submitted by
MRS. W. J. PEYTON, 110 North Boulevard.
One cup butter, two cups sugar, four eggs, three cups Swansdown flour, two level teaspoons Rumford baking powder, one-third teaspoon salt, one cup milk, one teaspoon vanilla. Beat the butter and sugar until creamed, add the yolks of eggs well beaten, then the milk and vanilla, then the flour, salt and powder sifted together. Beat the whites of the eggs to stiff froth and add them last. Bake about twenty minutes in layer cake pans in a moderate oven.
Chocolate Filling—One cup sugar, one tablespoon butter, half cake Baker's chocolate, half cup milk, few drops vanilla. Break up the chocolate, put it with the milk in a double boiler. When dissolved and perfectly smooth stir in the other ingredients. Take from the fire, beat until smooth and use between the cakes, also on top and decorate with English walnuts, after being shelled and divided.

A good cake must be tender and melting. Cakes that contain butter are apt to disturb digestion and should be carefully made. The shortening and sugar should be thoroughly creamed until the sugar is dissolved or the texture of the cake will be very coarse. The stiffly beaten whites should be folded in last and cake baked immediately. Layer cakes should go into a quick oven, so that they may rise and set immediately before forming a hard crust on the outside. The recipe chosen as best this week has ingredients in proper proportions and correctly mixed. Pastry flour was used, which makes a much lighter cake than bread flour. The butter used in the chocolate filling keeps it soft and prevents the crumbling of the icing, which is so objectionable in layer cake. Milk makes a smoother and richer icing than water.
